UTE COLOURS AVAILABLE

Oxyplast is now the first powder supplier to Australia to carry Colorado White. So there is no longer any reason to compromise by using Pearl White or Toyota Whites on your Holden.

Other automotive whites available

- Cool White (Ford Ranger)
- Rodeo White
- Toyota 040 White
- Toyota 058 White

NO RINSE ZINC PHOSPHATE FOR ZINC SURFACES

This system produces a smooth, uniform grained, corrosion resisting, paint bonding zinc phosphate coating on zinc surfaces and requires no rinsing. Being able to reduce your line down to 3 stages makes it less hassle and ideal for jobs such as fencing.

CLEAN, RINSE, ZINC PHOSPHATE, FINISHED!!

Its that easy. Call us now for more info

ALUMINIUM STRIPPING

CLASSIQUE STRIP HPR-2 is a non-methylene chloride based paint stripper that will rapidly penetrate and remove industrial coatings from ferrous and non-ferrous metal surfaces. It is ideal for removal of polyester powdercoat from aluminium extrusions as it "dissolves" the coating instead of lifting it off in sheets. Epoxy, polyurethane, polyester and acrylic enamel coatings as well as epoxy hybrid and polyester powdercoatings are removed by CLASSIQUE STRIP HPR-2.

NON DANGEROUS RUST REMOVAL AND CORRSION INHIBITOR

D RUST 7 is a de-ruster formulated to treat steel prior to organic coating as well as removing white rust from zinc surfaces.

D RUST 7 is environmentally friendly, non-toxic, pH Neutral and safe. As well as being an effective rust remover D Strip 7 is also effective in preventing rust from

FUSION BONDED EPOXY

VALVEGUARD™ E-BL53220-S7 is a Fusion Bonded Epoxy powder coating designed for inner wall of tap water pipelines; pipe flanges, elbows, valves & pumps; fittings for central heating and pipe & steel products for superior corrosion resistance.

FEATURES

- Ease of application, excellent adhesion
- Smooth coating surface, low friction
- No harmful substance in the formulation
- Excellent mechanical & chemical properties
- Excellent cathodic disbanding resistance
- Excellent water resistance
- For use in contact with hot (85°C) and cold potable water

PVC POWDERS

DURAVIN ES compounds can be sprayed using both corona and tribo charged systems. Wire goods spray well with corona system and the highly polar vinyl particle charges equally in both positive and negative modes. The frictionally charged tribo system performs excellently with DURAVIN ES on complicated substrates because of the larger particle size which aids particle projection.

Ideal for buzz bars, welded wire mesh, fencing and anything that requires a soft coating than polyester or epoxy powders.
